DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Figure 1, Figure 6, and Figure 7. The species are independent or distinct because they disclose variants that are not obvious over each other. Figure 1 discloses a pump comprising high frequency micro discharge devices and may generate electron pairs (page 3, lines 15-17). Figure 6 discloses an alternate embodiment, which comprises several sets of parallel pumping elements in a series of stages of the pump (page 13, lines 15-17). Figure 7 discloses a third embodiment, which comprises three stages and as many parallel elements as needed to achieve the desired flow of a fluid (page 19, lines 11-15).
2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.
3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

5. Applicant should note that the large number of references in the attached IDS have been considered by the examiner in the same manner as other documents in Office search files are considered by the examiner while conducting a search of the prior art in a proper field of search. See MPEP 609.05(b). Applicant is requested to point out any particular references in the IDS which they believe may be of particular relevance to the instant claimed invention in response to this office action. Applicant is also reminded that all documents that are submitted in the IDS must be reviewed and deemed relevant to the current application.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Bertheaud whose telephone number is (571) 272-3476. The examiner can normally be reached on M-F 9am - 5pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on (571) 272-4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
